CONTROLLEDCARE

BUTTONS & PULL CORD STATIONS

Fully-featured digital I/O (input/output) control appliance The Buttons Station provides push button registration of nurse presence (LED indication), or aide presence (LED indication) at remote locations. The nurse/aide presence indicator unit can also be used to transfer nurse follower feature from room to room as nursing staff proceeds with rounds. Depressing the nurse presence registration button automatically transfers indication of all subsequent patient calls to the remote location of the nurse, as well as to the master station. Plug-in connectors provide for simple wiring.

ControlledCare's Bed Station can be deployed wirelessly (battery operated) or wired. These bed side stations are commonly deployed near one or two beds (such as shared rooms.) The stations support call cords with wired attached buttons and display which resident or patient requested assistance.

TYPICAL SCENARIOS

Patient-Staff Alert: To alert staff, a resident presses their call cord button which triggers a transmission to the ControlledCare Even Managment Service. When the staff arrive in the room to assist they will press the Cancel button to clear the call.

Staff Assist Alert: Thebutton is used by staff if they are in the room and need additional help. Pressing the button will send a Staff Assist notification to other staff with the proper room location. Or Check-in, Cleaning Required, General Info etc.

There are maximum 4 buttons, allow to have a combination of 2, 3 or 4 in total. All are LED lit in order to show the status and reason of the alarm. Any button can be customized for any required features.

There are three sizes available, all fit into standard gang boxes. Can be signaling only, Full Duplex Audio, Audio/Video, RFID for identification or embedding all.

Wireless version running from Li-Io 18650 battery or external source. Excellent wireless penetration through structures such as walls and floors.

Ultra-Low power consumption with 20,000-1,000,000+ messages over 5-10 years on a single battery

FEATURES
