

BUTTONS & PULL CORD STATIONS

BUTTONS AND PULL CORD STATIONS

The button station is based on a modular design that allows for multiple button configurations and pull cords. Comes in a battery operated design for wireless installations. The buttons are illuminated with LED indicators to show active operation and alarm status. Button stations can be deployed as a full feature patient station, or for staff to request services such as cleaning, and even staff assistance.

ALARM BUTTONS AND BED CORD

From One to Four Illuminated Buttons and Bed Cord interface with Plug-Out detection

WIRED OR WIRELESS VERSIONS
