

# PANIC ALARM BUTTONS

The **ControlledCare PUSH BUTTON (CCBTN)** can function as a panic button, general emergency alert, or many other push-button applications. Once the button is pressed it generates a pre-programmed event or action that is sent directly to the Event Management System (EMS). The EMS is capable of tracking the push button alarm location, facility zone, and even room number.

This push button is lightweight, water resistant and features a durable design. With the standard battery you can expect up to 3 years of usability. It works in tandem with our advanced controller to offer features such as zone by zone alarm presence, button location, and many other applications.

### LOCATION AWARE AND REPORTING

Alarms include the physical location of the button when combined with our Event Management System.

### LONG BATTERY LIFE

20,000-1,000,000+ transmissions on a single battery, (1-3 year battery life)

### RAPID DEPLOYMENT

Pre-configured and ready to deploy.

### SECURE TRANSMISSION

Communications are encrypted and secured using the latest encryption standards.

### STANDALONE OR INTEGRATABLE

Integratable with existing nurse call and alert systems, or deployable as a standalone solution.

### BATTERY

User replaceable standard battery.

### ACCESS CONTROL AND ZONING

Using RFID technology, the button can be used as access control keys or zone restriction.

### WATER RESISTANT AND DURABLE DESIGN

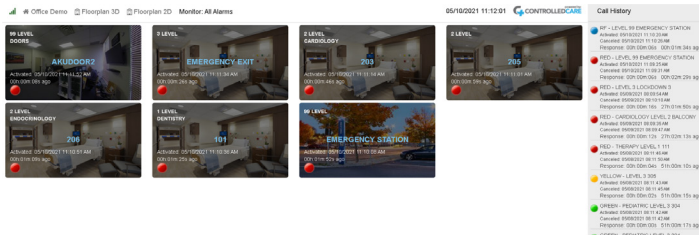

Lightweight, durable design with an IP68 rating.

- ✓ Designed to be reliable and user friendly.
- ✓ Lightweight and easy to carry as a lanyard or wristband.
- ✓ Full reports and escalation of calls via our Event Management System.
- ✓ Allows patients to request emergency help anywhere in your facility.
- ✓ No reliance on existing protocols or communication systems.
- ✓ No limit on number of buttons that can be deployed.

## APPLICATIONS

Healthcare resident pendants  
Panic and emergency buttons  
Asset tracking  
Zone restriction  
Independent living monitoring

## SPECIFICATIONS

Battery: 3V to 6V Li-Lo, user replaceable  
IP Rating: IP64 with replaceable battery  
IP Rating: IP68 with non-replaceable battery  
Coverage: 100m to 200m in any zone (radius)  
Frequency: 433Mhz  
Weight: 28g (1oz)  
Size: 72mm (28.4") x 17mm (0.7") x 37mm (1.5")  
Construction Material: Plastic ABS
