CONTROLLEDCARE

PANIC ALARM BUTTONS
WITH POSITIONING

The ControlledCare SINGLE PUSH BUTTON (CCBTN) can can be used as a panic button, personal emergency response, or other remote push-button applications. When the button is pressed, an alarm event or action is generated. The wireless signal is supervised, meaning that events will not risk being unacknowledged.

The QI Wireless charging option allow the buttons to be charged as needed, reducing its environmental impact and operational cost over its lifetime.

LOCATION AWARE AND REPORTING
Alarms include the physical location of the button when combined with ControlledCare's location beacons.

LONG BATTERY LIFE
20,000-1,000,000+ transmissions on a single battery, and a 4-12-year battery life*

PRESENCE AND LOST MODE
Automatic wake-up for presence and lost mode.

VISUAL AND AUDIO ALERTS
Visual LED light alarm mode and/or Internal Buzzer for auditory location notification.

AUTO ERROR REPORTING
Automatic error reporting through supervisory messages

LI-PO BATTERY AND QI WIRELESS CHARGING
User replaceable standard Li-Po battery and standard QI Wireless Charge

AUTO REPORTING
Automatic low battery reporting and supervisory reporting

WEB INTERFACE
Buil-in web configuration interface allows for easy setup and programming.
