CONTROLLEDCARE

PUBLIC ALARM STATIONS

BUTTONS AND PULL CORD STATIONS

The Voice Station is designed to make bi directional voice calls in case of emergency, to generate alarm events on the Nurse Call System, to push notifications about alarms and alert, to reflect the status of the alarm using LED light, and to control executable devices attached to it.

It is supporting multi-functional mode and capable to control and manage third party components

ALARM MULTI-FUNCTIONAL BUTTON
Momentary push, or hold to reset modes

ALARM STATUS LED
Steady or blinking LED to reflect the alarm status

SELF ILLUMINATED
LED illuminated buttons show action status

HYGIENIC DESIGN
Flat surfaces and ABS construction material are easily cleaned and disinfected.

ERROR REPORTING
Automatic error reporting through supervisory messages.

INTERNAL RELAY AND DIGITAL OUTPUTS
Can control external devices such a door strike, dome light or any other ones

STANDARD MOUNTING SIZES
Standard single, double or triple gang size Wall-In or Wall mount options

POE OR 12V POWERED
Standard PoE source or external power supply
